

## ESD long broom set

Our anti-static brooms, shovel and garbage shovel all from anti-static raw materials for injection molding (non-surface coating), which can be washed with water, cleaned with alcohol, and the anti-static effect will not be lost forever.

If you want to determine whether it is produced by full electrostatic injection molding, we recommend that customers can use the knife to scratch the surface of the product after testing.

### Parameters:

Name of Product: ESD Broom

Material: ESD PP

Surface resistance: 10E5-10E9

Friction voltage: less than 100V

Specifications: broom L270\*H900MM

Garbage shovel L280\*W270\*H850MM

Colour: Black

Remarks: Permanent anti-static
